

Functions

Syntax same as of Python, just in place of def, we use FUNCTION here.

// Another way to write a function

```
→ CONST LETSPLAY = FUNCTION(PLAYER) {  
  LET P = '{PLAYER} IS THE BEST PLAYER  
  OF CRICKET!';  
  RETURN P;  
}
```

```
NAME LET NAME = "WMAF";  
LET VAR = LETSPLAY(NAME);  
CONSOLE.LOG(VAR);
```

// Function inside an object

```
→ CONST MYOBJ = {  
  NAME: "WMAF",  
  AGE: 100,  
  PROF: FUNCTION() {  
    RETURN "ETHICAL HACKER!";  
  }  
}
```

```
console.log(myObj.profile);
```

→ Scope

- let / const have block level scope.
- var has function level scope.
