

Variables:

3

LET / CONST / VAR → These are 3 kind of variables in JS.

|| Rules for creating JavaScript Variables:

- 1) Cannot start with numbers.
- 2) Can start with letters, numbers, - or \$
- 3) Are case sensitive.

|| Most common programming case types:

1) CAMELCASE

2) KEBAB-CASE

3) SNAKE-CASE

4) PASCALCASE

→ VAR & LET can be modified but CONST is constant.
